Profile

Analyst with experience across business systems, data validation, financial and operational reporting, workflow automation, stakeholder coordination, issue tracking, and process improvement. Combines a Master of Management Sciences, Computing background, and Economics minor with hands-on skills in Excel, Power Query, Power BI, Tableau, SQL, Python, Jira, Visio, Microsoft 365, and documentation. Strong fit for analyst roles requiring structured problem solving, data integrity, reporting, requirements gathering, cross-functional communication, and practical operational execution.

DATA & REPORTING Excel, Power Query, dashboards, SQL/Python, metrics	OPERATIONS Tickets, issue tracking, controls, documentation, follow-up	BUSINESS ANALYSIS Requirements, process maps, stakeholder communication

Experience

Investment Management Corporation of Ontario Sep 2025 - Jan 2026 | Toronto, ON
Business Systems Analyst Intern

- Automated recurring compliance and financial reporting workflows using Excel and Power Query, reducing manual effort by 40% and improving reporting efficiency by 30%.
- Analyzed 150+ monthly service tickets to identify recurring data quality issues, workflow gaps, reporting pain points, and 8+ automation or process improvement opportunities.
- Prepared data configuration standards, Service Desk guidelines, enhancement proposals, and Visio process maps to improve transparency of controls, ownership, and handoffs across 10+ stakeholders.
- Created 15+ Microsoft 365 Copilot training resources and supported business users with practical guidance for productivity, workflow, and tool adoption.

Nissan Motor Corporation May 2024 - Dec 2024 | Mississauga, ON
Business Systems Analyst Intern

- Validated financial and product module data, resolved 15+ requirement conflicts, and maintained traceable documentation across product, business, and technical teams.
- Built Excel and Tableau dashboards tracking financial performance, portfolio trends, and operational metrics, improving visibility for business decision-making by 15%.
- Coordinated Jira issue tracking and Agile release support across 3 release cycles, achieving 95% defect resolution while keeping status, risks, owners, and timelines visible.
- Mapped financial and operational workflows, reducing manual processing by 30% and improving repeatability of reporting, testing, and stakeholder handoffs.

MEC-Tech Feb 2026 - Present | Remote
Algorithm Engineer

- Support enterprise knowledge base AI and general AI assistant initiatives, including DeepSeek API integration into DingTalk-style workflows, prompt logic, retrieval-ready product knowledge, and business-user automation.

HGTECH May 2023 - Aug 2023 | Wuhan, China
International Business Analyst Intern

- Analyzed 1,000+ CRM and multi-channel inquiries to identify customer trends, recurring issues, demand signals, branding opportunities, and marketing improvement areas.
- Built 10+ multilingual product websites with HTML/CSS, supported SEO/UX improvements that increased traffic by 28%, and assisted international marketing, branding, and exhibition activities.
